

Behavioral Healthcare Center of Excellence - Erie County Medical Center

Buffalo, New York

This new, \$25 million Behavioral Healthcare Center of Excellence at Erie County Medical Center (ECMC) offers a comprehensive psychiatric emergency program (CPEP), outpatient areas, and state-of-the-art inpatient facilities to serve mental health patients across Western New York. The center expands ECMC’s current emergency behavioral health facilities from 6,500 to 18,000 square feet. Additional project work included the consolidation of both ECMC and Buffalo General’s outpatient programs and provided for a combined 180 mental health inpatient beds.
