

Holy Cross Church and School

Albany, New York

Based on a master plan completed by architecture+ for the church and school complex, the firm was commissioned to implement the plan. The work was composed of three primary elements. A major addition was designed to the church and school which contains a gymnasium and social hall, a cafeteria, and parish office space.

Renovation of existing school space created a new library/media center and three new classrooms, and major renovations were undertaken on the existing sanctuary space in the church.
