Viking Child Care Hudson Valley Community College

Troy, New York

The Viking Child Care Center serves the children of students and staff at Hudson Valley Community College. We designed interior finishes including casework, security/access systems and flooring. Components such as countertops with changing tables, hand sinks and food preparation areas were selected to serve as natural room dividers without restricting the teachers' view of classroom activities.

The facility accommodates 128 children in ten classrooms. Other features include two enclosed playgrounds, ten multi-use classrooms for college/community use and a fully equipped kitchen.

Award

Outstanding Architecture, Education Design Showcase, School Planning and Management, 2002
