Stadium Golf Club House

Schenectady, New York

We were commissioned to design this new 13,000 square foot facility to house a first-class clubhouse for the Course.

The building includes a restaurant and banquet facility (which accommodates 200) along with additional space for a patio (which accommodates 150) that overlooks the final two holes of the course, a Pro-Shop, bar, conference room, lockers and offices. The design optimizes the site and landscape by creating a new entrance axis and vistas to the 9th and 18th greens as well as the driving range.
