

Capital District YMCA

East Greenbush and Guilderland, New York

We designed the new, 55,000 square foot multi-use prototype facility. It contains an eight-lane Olympic-sized swimming pool, a gymnasium equipped for competition basketball and volleyball, a running track, fitness room, aerobics facilities, multipurpose room, child care facilities, whirlpool, sauna and steam rooms, and various administrative and support areas.

The design allows for expansion of the natatorium and the addition of squash and racquetball courts. Playing fields, outdoor playground facilities and picnic areas were also part of the overall master plan. This prototype design was used at both the East Greenbush and Guilderland locations.
